

INPLANT UPDATE

Due to issues in Mexico around the COVID situation, GM have moved 8 000 units from Mexico to our plant.

GM asked us to build these over the shutdown period. There was a sign up period, but we did not get enough people to volunteer to run but that is within everyone's rights.

CAMI will be coming out with a new production schedule to build the 8 000 additional units. We will be on mandatory Saturday overtime, both shifts for July and August. The rotating layoffs will continue, however the weeks you work, the Saturdays will be mandated.

We still have 65 members permanently laid off. They will all be recalled back as fulltime members beginning the first day after shutdown.

Joe Graves and Mike Van Boekel will be putting out a video on our website next Tuesday explaining more details.
